

WEBINAR

OPEN DISCLOSURE & DUTY OF CANDOUR

Experiences from different common law jurisdictions

4 MAY 2023 | 5.30PM– 7.00PM (GMT +8)

Open disclosure is an open discussion or a series of discussions that healthcare professionals have with patients, their family and carers about incidents which result in harm during healthcare. The purpose is to ensure clear communication as well as maintain trust and confidence between patients, their family and healthcare professionals.

As the process of open disclosure needs to be performed effectively to achieve the desired purpose, it is crucial for healthcare professionals to learn how, what and when to do it.

In this webinar brought to you by Allied World, our distinguished speakers will share their experiences in open disclosure from the medico-legal perspective in Hong Kong and Australia, as well as from the ethical and professional perspectives in Singapore.

When: Thursday, 4 May 2023 | 5:30pm – 7:00pm (GMT +8)

Please join us at the webinar by clicking on the button below to register. If you have any queries, please email us at apac.communications@awac.com.

We look forward to seeing you!
